SUMMARY

Motivated and technically minded Computer Science student with studies in cybersecurity, networks, and software development, supported by practical work experience in chemical manufacturing, retail food services, and merchandising. Brings strong problem-solving skills, attention to detail, and the ability to troubleshoot issues, follow procedures, and learn new systems quickly. Confident working independently or as part of a team, with a reliable work ethic and a strong interest in building skills across technology, support, cybersecurity, and software-related roles.
